

《乘除法的意义和各部分之间的关系》学程拓展

1. 进入知识宫的密码是     请先破译密码。

$$14+82-\text{blue circle}=87, \text{blue square}\times 6+10=58$$

密码是：()

2. 把下面每组用图形表示的算式改写成一个综合算式。

①
$$\begin{array}{l} \triangle - \square = \text{red circle} \\ \text{yellow triangle} + \text{yellow square} = \text{blue circle} \\ \text{red circle} \times \text{blue circle} = \text{blue diamond} \end{array}$$

②
$$\begin{array}{l} \text{green triangle} \times \text{green square} = \text{white circle} \\ \text{black triangle} \div \text{black square} = \text{yellow circle} \\ \text{white circle} \times \text{yellow circle} = \text{white diamond} \end{array}$$
